

Quality Genetics Built on a Heritage of Commitment
HEART RIVER RANCH & OPEN A ANGUS

Annual Production Sale
Wednesday, March 8, 2017
The Feedlot • Belfield, ND • 1 p.m. MST

HD 50K

DVAuction Broadcasting
Real-time Auctions

Dear Friends,

Heart River Ranch took an amazing journey in 2016 from one end of the weather spectrum to the other but anything can happen in the Dakotas. We had a record precipitation year in SD followed by a severe drought at the ranch and at headquarters in ND. We managed about 100 bales of hay total and fortunately the open winter that led to this dry spell also allowed us to graze through most of last winter and keep a lot of the hay in inventory. You did not have to go very far to find the other end of the spectrum this past summer so we managed to source some hay and keep the wheels turning.

Given the dry conditions and no creep, the cows did a good job. The steer mates to the bulls sold two days later than last year and weighed 2 pounds less. Every steer left after 50 bulls were selected made it on the pot at a 589# average for late march average age calves. Needless we were pleased given our objective of raising consistent sustainable cattle without creep with limited resources.

This is the 11th Annual production sale and we will again hold the sale at the feedlot location south of Belfield. We have been in the registered cattle business since 1996 and our aspirations to provide functional, efficient cattle that can be sustained in any environment have not changed. We appreciate the many customers over the years that have been loyal to our program. Your interest and patronage drives us to find the type of cattle that will provide genetics to work efficiently in less than optimal conditions.

Look for video, carcass ultrasound and other sale information posted on www.openaangus.com and www.heartrivergenetics.com as we get closer to sale day. As always feel free to contact us with any questions or stop by the lot to view bulls at your leisure ahead of the sale 4 miles south of Belfield on highway 85 and then ½ mile west on 40th Street SW.

You are also invited to join us on Tuesday evening for a prime rib supper at the development lost sale barn on March 7, 2017. We look forward to having you as our guest on March 7 and 8, 2017. Thank you for your friendship, your loyalty and past patronage.

Internet and Absentee Bids

We would prefer to visit with our customers in person but realize that not everyone can be at the sale; therefore we have made arrangements to bid through telephone or internet. Bids will be handled in strict confidence by any of the publication representatives or the respective ranches. If you would like to discuss the sale offering call us preferably several days before the sale, and we can help select your genetics. Keep in mind that we are sure that we have a bull that will fit your needs. After the sale you will need to contact Annette at 701-575-8145 or 701-290-9745 to make arrangements for payment of telephone purchases.

Storm Date

In case of postponement please listen to the Northern Ag Network, KLTC 1460 AM or go to northernag.net, ndstockmen.org, heartrivergenetics.com or openaangus.com for any postponement announcement. Postponement sale date is set for pre-sale activities: March 10, 2017, 6:00 p.m. and sale March 11, 2017, 1:00 p.m.

Transportation

Belfield, ND and Dickinson, ND are both served by bus. Dickinson, ND is also served by United, Delta and Frontier Airlines. Please call 701-575-8145 or 701-290-9745 if you need transportation from the bus or airport.

Announcements

Errors discovered in the catalog will be corrected by announcements from the auction block at sale time and such corrections will take precedence over the printed matter in the catalog.

Liability

All persons who attend the sale do so at their own risk. Neither the owners, management, sales staff, facility or any person connected with this sale assume liability, legal nor otherwise, for property loss or for any accidents that may occur.

Delivery

Free Delivery to central points up to 500 miles. Balance will be at cost. We will make every effort to assist in deliveries of greater distance or by private arrangements and volume purchases. Delivery will be made at our convenience and efforts will be made to have bulls delivered by April 1.

Feeding and Development of Bulls

All bulls of HRR and Open A were weaned in late October and did not receive creep feed with the exception of a few Open A bulls that were ET calves produced at a recipient herd. Calves received their pre-weaning and weaning vaccinations and were handled in every respect as all natural. Bulls were fed to gain 2.5lb per head per day on a 1% grain and by product rotation. Bulls were fed free choice mineral, salt, and hay. We took yearling weights at approximately 105 days post weaning with no post weaning adjustment period or warm up period. Our intent was to grow out the bulls for maximum longevity and integrity of the bull.

Historic Photos

Most of the historic photos in this catalog were taken by Inez Kessler, Annette's great grandmother between 1905 and 1908 in the Gaylord, ND area. Inez was the only person to have a camera in the area and as a result she took pictures of many people and events. The town of Gaylord was located about 13 miles south of Belfield, ND along US Highway 85. The Gaylord Post Office and store was a stop for travelers going south. This building still stands at the Curt Molm place.

Sale Terms & Conditions

The terms of the sale are cash. No release will be given until satisfactory settlement has been made. All settlements will be made with the clerks of the sale immediately after the sale. We reserve the right to withhold animals from shipment for whom payments have not been received prior to departure date. Every animal sells to the highest bidder and in cases of disputes, the auctioneer's decision will be final. All Sales are subject to an acceptable semen examination. Semen evaluation certificates will be furnished to the buyer at delivery.

Bulls were carcass ultrasounded on February 25, 2017.

Updated EPD information, carcass ultrasound, and 50K data will be provided at the sale and available at www.heartrivergenetics.com or www.openaangus.com. This information will be available as soon as it is received from the Red Angus Association of America or the American Angus Association.

All bulls have been tested using the Zoetis 50k genomic test and parent verified.

Health certificates and brand releases will be furnished for shipment anywhere in the United States.

Each animal carries a readable tattoo or freeze brand.

Insurance

Ownership risk to purchaser commences when the auctioneer's hammer falls. Insurance will be available sale day. It is recommended that buyers insure their purchases for safe delivery. Purchaser assumes the risk of death or injury to their livestock immediately after the sale.

Heart River Ranch and Open A Angus

Loss of Use Policy

2017 optional loss of use policy: Heart River Ranch and Open A Angus are striving to offer the best options not only in beef animal genetics but also loss of use protection for bulls and/or females we offer to our customers. We would like to introduce our customers to the Stockman's Insurance Policy which to the best of our knowledge and research offers the best protection to you, our customers.

Heart River Ranch/Open A Angus will pay 4% of sale price toward the Stockman's Insurance policy. The balance of the policy will be paid by the customer. If the customer chooses to decline the policy, Heart River Ranch or Open A Angus has no obligation to cover any losses due to injury, sickness or death. Heart River Ranch/Open A Angus does guarantee all cattle to be sound the day of the sale. All bulls will be semen tested by the Wibaux Vet Clinic in March/April 2017.

Breeder's Guarantee: All bulls are guaranteed to be breeders. All claims for adjustment or refund must be made in writing within six months of the sale date. In the event a bull is claimed to be a non-breeder, the purchaser may return the animal to the ranch of the seller if in good condition and complying with the health requirements of the Seller's state. The Seller will be entitled to six months trial following the return of the animal in which to prove that the animal is a breeder. If at the end of six months, the Seller shall be obligated to replace the animal with another of equal value or to refund the purchase price. The return of the full purchase price shall in any case be deemed full satisfaction and settlement. If the Seller proved the animal to be a breeder, it shall be the obligation of the purchaser to take delivery of the animal at the purchaser's expense.

Implied warranty: Except for those stated in the terms and conditions, there are no warranties or implies, as to merchantability or fitness for a particular purpose with respect to the cattle being sold in this auction. The warranties set forth in the terms and condition are in lieu of all other warranties, either expressed or implied and the remedies provided therein shall be the sole and exclusive remedy of the buyer, or any party claiming through the buyer, for any breach of warranty or guarantee therein provided and all other obligations or liabilities.

Health

Bulls and heifers were treated with Enforce at birth and branding and were calfhood vaccinated with 4-way and 7-way. At weaning, calves were given a 5-way, 7-way and One Shot, boosters were also given. Calves and cows were poured with Dectomax in the spring, fall and late winter. All bulls will be vaccinated with Preg Guard, Endovac and dewormed prior to delivery. All females are Bangs vaccinated and on a fall vaccination program.

Semen Tests: Bulls will be semen tested after the sale.

Semen Interests:

Heart River Ranch and Open A Angus are each respectively retaining 50 percent revenue-sharing semen interest in every bull selling in this sale. Full possession and full salvage value sells on all bulls. If a buyer chooses to collect and market semen, the seller will share proportionately in the collection costs and revenues earned. In the event that the seller chooses to collect semen for "in herd" use, it will be done at the seller's expense and at buyer convenience. Semen will be made available to buyer at cost.

Volume Discounts

We are pleased to give a volume buyer discount. You will receive 5% off of purchases of 5 to 9 bulls, and 10% off of 10 or more bulls. Please notify the clerk when you check out to receive your discount. This is another way to say "Thank You" for your trust in our program.

Buy a Bull – We'll Buy Your Tags!

If you purchase a bull from us, we will purchase one bag of FCCP or Allied Access tags per bull for you.

All you need to do is call the Red Angus Marketing Department, answer a few management questions, and enroll your calf crop for free. Then start reaping the premiums through Red Angus' marketing programs!

Feeder Calf Certification Program (FCCP) "yellow tags" are for bull customers using ONLY Red Angus bulls. FCCP cattle are accepted into the Choice+ Grid and Pro-Cow Program. Cattle enrolled in FCCP are USDA genetic, source and age verified.

Allied Access "green tags" verify source and age for bull customers utilizing halfblood bulls in their planned crossbreeding program.

RedAngus.org • (940) 387-3502

Bull Selection – Simplified.

Red Angus stakeholders have enjoyed the capability of selecting bulls based on economically relevant traits (ERTs), such as Heifer Pregnancy or Stayability, that truly impact their operations profitability. While these ERTs allow for efficient selection decisions, the growing number of ERTs and EPDs has resulted in confusion as producers attempt to estimate a sire's overall impact. In response, RAAA has developed the HerdBuilder and GridMaster indices, which answer the question:

"What impact will each potential sire have on my operation's profitability?"

HERDBUILDER

Producers selecting bulls to develop profitable replacement females and maximize the value of non-replacement marketed progeny should incorporate the HerdBuilder Index into their selection decisions.

The HerdBuilder Index is built using the following scenario:

- Red Angus bulls mated to cows and heifers
- Replacement heifers retained from within the herd
- All remaining progeny sold on a quality-based carcass grid

Given that replacement heifers are retained, significant influence is placed on the obvious maternal ERTs of Stayability, Heifer Pregnancy and Calving Ease. Additionally, with all remaining progeny sold on a quality-based carcass grid, Marbling, Yield Grade and growth EPDs also impact the HerdBuilder Index.

GRIDMASTER

Use the GridMaster Index if your operation's primary goal is maximizing profitability of feeders in the feedyard and on the rail.

The GridMaster Index is built using the following scenario:

- Red Angus bulls mated to cows
- All progeny sold on a quality-based carcass grid

Marbling, Yield Grade and growth EPDs are the traits of primary importance in the GridMaster Index.

Ranch Tested. Rancher Trusted.

XO Crowfoot 0102X is a black-red carrier bull and we had a run of good luck with getting red calves this year out of him. The power of this sire in terms of adding muscle, rib and depth of body as well as a wide base is significant. A nice offering of his sons will start the sale. His first daughters in our herd will be calving prior to the sale. He ads fleshing ability, sound feet and correct structure.

Ridge Legend 4094 is another Sand Bur Ridge bull with a big ribeye who was a maternal brother to a bull we purchased a few years earlier and whose daughters were very functional. This guy is dark dark red and really stamps his offspring with tremendous tops and quarters.

YR	100

The first time we saw offspring of Red Flying K Max 159Y, it was on our agenda to use him in some form. Fortunately, with savvy partners - Arrowsmith Ranch and Sandbur Ridge, we were able to own a semen interest and will be using this outcross proven ma-

ternal bull extensively. His sons and daughters have been high sellers in production and special sales in the US and Canada. Max is an attractive sire of moderate frame, productive, structurally correct progeny with his generous capacity and mobility. He fits our game plan of producing sustainable functional cows and bulls to advance the great things the Red Angus breed is known for. Semen is off the market until 2018 after a limited offering was sold this past January.

American Angus Association \$Value Indexes

\$Values are multi-trait selection indexes expressed in dollars per head, to assist commercial beef producers by adding simplicity to genetic selection decisions. A \$Value has meaning only when used in comparison to the \$Value of another animal. For example, just as with EPDs, variation in \$Values between animals indicates average expected differences in the relative value of progeny if random mating is assumed and the calves are exposed to the same environment.

How do I use them?

\$Values should be used to complement the criteria that producers already use when selecting bulls.

The \$Values are not designed to be driven by a single trait, as an index is multi-trait by design. These selection tools are the result of the application of industry-relevant market values to Angus genetics for preweaning, feedlot, and carcass merit.

The \$W, \$F, \$G and \$B values on individual animals and the Sire Evaluation Report may be viewed at www.angus.org.

American Angus Association
3201 Frederick Avenue ■ St. Joseph, MO 64506
816-383-5100
ahir@angus.org ■ www.angus.org

\$Values			
\$W	\$F	\$G	\$B
+21.28	+13.60	+12.53	+25.32

Weaned Calf Value (\$W): an index expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F): an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning performance compared to progeny of other sires.

Grid Value (\$G): an index expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Beef Value (\$B): an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires. The \$B value combines the contributions of \$F and \$G.

HRR Crowfoot 6182 is the full ET brother to lots 2 and 3. He is similar in profile, length and thickness. Black angus sires do not have stay EPDs so these guys are not reflecting their true stay but the fact that their 16-year-old dam, Ridge Casey 871-028 is still in production should speak for itself.

You will like this 5L Advantage 221Y son for his style, balance, dark red color and it did not hurt that he was the high weaning weight calf in his contemporaries. His EPDs highlight his growth potential. Check him over as he is pretty complete. He may be used on larger heifers with discretion and go on to service cows. He has a small head, lighter bone and three proven calving ease sires close up in the pedigree. You be the judge. Dam's MPPA : 105.3.

HRR Bo 6109 is a dark red ET bull mating a high-powered Glacier Logan 210 donor dam to the sure fire calving ease Steadfast Boaz. Maternal genetics should come through both sides as 429 has a 104 MPPA and a 34 milk EPD. Full ET brother sells as lot 43. Here is a promising genetic package late in the sale.

HRR Bo 6185 is out of a powerhouse of a cow, HRR Collen 429, that we raised and went on to be a top donor cow for Jacobsen Red Angus and Twedt Red Angus. We had a opportunity to flush her and this is a mating to a sure fire calving ease sire. It looks like HRR Bo 6185 will follow his sires path. Look for good daughters from him. Full brother to lot 40.

LOT 102 – HOTR B413 R WINDY D6501

For the eighth year in a row, Home On The Range is participating in the embryo transfer program. Home On The Range has entered into a contract with Open A Ranch (Jim Arthaud) and Heart River Genetics (Annette Steffan). The staff and children bring in the cows, implant the CIDRs (a progesterone impregnated device), inject a shot of GnRH (gonadotropin hormone), remove the CIDRs and, finally, the embryologist transfers the frozen embryo into the cow's uterus.

The children are a little apprehensive at first, never really being around cattle and such a procedure, but once they get comfortable and know what their job is, they take responsibility. They put in ear tags and even learn how to palpate the cow later to see if she is pregnant.

It's a great program for Home On The Range and teaching children about cattle reproductions.

A Gathering in the Badlands ...
